

### Procedure

Weigh 0.5 g of the sample into the digestion vessel. Add 5 mL HNO<sub>3</sub> and 5 mL DIH<sub>2</sub>O. Gently swirl the mixture and wait approximately 15 minutes before capping the vessel.

### Notes

HCl should be added slowly and carefully to the sample. Allow any initial reaction to subside before sealing vessel.

### General Precaution

- This procedure is a reference point for sample digestion using a CEM system and may need to be modified or changed to obtain the required results on your sample.
- If using a vessel other than the recommended choice, adjust sample size and pressure limit to values appropriate for the vessel chosen.
