

# Discover® SP-D 80™ Method Note

## Microwave Digestion of Orange

#### **Procedure**

Weigh 2.5 g of the sample into the digestion vessel. Add 12 mL HNO<sub>3</sub>. Gently swirl the mixture and wait approximately 15 minutes before capping the vessel.

#### **Notes**

Sample must be completely covered with acid prior to digestion.

#### Results

Sample was clear, colorless, and particle free upon dilution to 50 mL.

### **General Precaution**

- a) This procedure is a reference point for sample digestion using a CEM system and may need to be modified or changed to obtain the required results on your sample.
- b) If using a vessel other than the recommended choice, adjust sample size and pressure limit to values appropriate for the vessel chosen.
